PROFESSIONAL SUMMARY

Computer Science graduate specializing in AI/ML with hands-on experience building and deploying ML systems achieving >90% classification accuracy, $R^2 > 0.85$ in regression tasks, and sub-200ms inference latency on edge devices. Proven ability to design end-to-end pipelines from data preprocessing to production deployment using Python, Scikit-learn, XGBoost, TensorFlow, and Keras. Experienced in MLOps practices including MLflow-based experiment tracking, Docker containerization, AWS EC2 deployment, and model optimization via quantization and pruning up to 80% size reduction.

EDUCATION

Bachelor of Engineering, Sathyabama Institute of Science and Technology Computer Science Specialized in Artificial Intelligence & Machine Learning CPGA: 8.11	09/2021 – 06/2025 Chennai, India
--	-------------------------------------

WORK EXPERIENCE

LinkB Network Private Limited	
Machine Learning Intern - Built and optimized inference-ready Edge ML pipelines for mobile devices under 2GB RAM, achieving below 200ms latency and reducing model size by 80% using quantization and pruning.	02/2024 – 03/2024 Chennai, India
Revenue Operations Specialist - Drove 31% improvement in conversion and reduced onboarding time by 54%, by optimizing checkout flows, integrating dynamic pricing, and streamlining subscription lifecycle management.	06/2025 – 12/2025 Chennai, India

SKILLS

Programming Languages — Python, SQL, Javascript, HTML5
Data Analysis & Visualization — Pandas, Numpy, Matplotlib, Seaborn, Plotly
AI & ML Frameworks — Scikit, XGBoost, TensorFlow, Keras, OpenCV, NLTK, SpaCy
MLOps & Tools — MLflow, DagsHub, Docker, Nginx
Cloud Platforms — AWS EC2, Firebase
Core Competencies — Exploratory Data Analysis, Feature Engineering, Machine Learning, Computer Vision, Deep Learning, Transfer Learning, Natural Language Processing, Large Language Models, Prompt Engineering, Experiment Tracking

PROJECTS

Garbage Image Classifier  , Tech: OpenCV, Tensorflow, MLFlow, Streamlit, Docker, AWS EC2 - Enabled data-driven property investment decisions by building an end-to-end analytics dashboard, achieving $R^2 > 0.85$ in price prediction and >90% classification accuracy using Scikit-learn and XGBoost. - Implemented an interactive image classification interface using Streamlit, integrated model caching from remote registry, reducing model load time by 90% and enabling inference response within 1 second per request. - Containerized application using Docker and deployed on AWS EC2, configured NGINX with SSL via Certbot, ensuring 100% HTTPS traffic encryption.
Real Estate Investment Advisor  , Tech: Python, Scikit-learn, XGBoost, MLFlow, Streamlit - Developed an end to end real estate analytics dashboard, leveraging regression models for price prediction with R^2 more than 0.85 and classification models for investment decisions with accuracy more than 0.90, enabling data driven property investment recommendations for property buyers.
Real Estate Market Analysis  , Tech: Python, MySQL, Streamlit. - An interactive real estate market analytics dashboard to clean, structure, analyze and provide insights on 20K+ property records with 15+ visualization charts.
Mobile Neural Machine Translator  , Tech: Python, Tensorflow, Keras, NLTK - Designed and trained a Seq2Seq neural machine translation model with attention on 113K+ OPUS bilingual sentence pairs, achieving 0.7285 accuracy using early stopping. - Applied post training quantization, shrinking model size from 150 MB to 25 MB, optimizing for offline mobile inference. - Delivered real time translation latency under 200ms on mid range Android devices, maintaining under 50 MB RAM consumption during inference.

RESEARCH

Embedded Language Translation Based on GRU Gated Attention Model  , IEEE	29/05/2025
- The research focuses on developing an advanced machine translation system that leverages the power of Gated Recurrent Units (GRUs) and attention mechanisms, to deliver a robust, scalable, and high-performace embedded translation solution that can operate in real-time without internet, breaking language barriers.	

COURSES

IIT-M Pravartak Certified Artificial Intelligence & Machine Learning, HCL Guvi (Zen Class)	01/2026 – Present
- Comprehensive 5 month project based program covering the fundamentals of Python, Machine Learning, Deep Neural Networks (PyTorch), Computer Vision (CNNs), Natural Language Processing (NLP), and Prompt Engineering (LLMs/OpenAI).
